LONGEVITY.

Organic Curcumin

Oxidative stress is the cause of many degenerative conditions in the body. Curcumin is a powerful antioxidant, derived from the roots of the turmeric plant, that has been used in Asian medicine for centuries due to its many health and wellness benefits. Beginning at the cellular level, curcumin helps neutralize free radicals to protect against oxidative stress and cell deterioration.

Our enhanced formula includes 95% curcuminoids, the active compounds in curcumin, and organic ginger for added antioxidant support. The ginger also helps to promote absorption and acts synergistically with BioPerine® to improve the bioavailability and benefits of curcumin.*
