Probiotic drops with vitamin D

What are probiotics?

Probiotics are dietary supplements, like vitamins and minerals. The word probiotic means "for life" as opposed to antibiotic which means "against life." WHO defines probiotics as live microorganisms which, when administered in adequate amounts, confer a health benefit on the host.

Lactobacillus reuteri Protectis is BioGaia's own patented probiotic bacteria. Because *L. reuteri* Protectis naturally occurs in the human body it is adapted to reside in humans.

Licensed by: BioGaia AB

Protected by corresponding patents of US7,374,924, US7,955,834, US8,114,397, US8,785,183, and other issued and pending patent applications.

Country of origin: Sweden

BioGaia ProTectis is a dietary supplement containing *Lactobacillus reuteri* Protectis® that helps the good microorganisms restore a natural balance in the gut.* *L. reuteri* Protectis has been tested in a number of clinical studies and proven both effective and safe for children.*

An adequate dietary intake of vitamin D contributes to healthy immune function and the maintenance of normal bone and muscle function.* Vitamin D is also needed for normal growth and development of bone in children.*

The package includes a white desiccant device for prolongation of shelf life. The desiccant device is approved for use in direct contact with food, but should not be consumed.
