

As key players on the amino acid team, **L-Arginine & L-Ornithine** needs are elevated in times of intense stress. L-Arginine acts as an antioxidant and a precursor to nitric oxide to promote healthy dilation of blood vessels and blood lipid levels. Antioxidants prevent free radicals from destroying cells and support healthy blood flow. L-Ornithine, a precursor to L-Arginine, may help promote lean body mass anabolism.[†]
