

The seed makes the difference. This product contains BroccoRaphanin, the original sulforaphane glucosinolate (glucoraphanin) derived from CS Health LLC's proprietary broccoli seed variety. Our seed was bred by natural selection (non-GMO) and contains the highest concentration of sulforaphane glucosinolate available. On ingestion, Vitalica converts to sulforaphane in the body, activates Phase II enzymes, protects DNA from free radicals and promotes immune system health.*
