GUARANTEED PURE

Structural System Support*

Nature's Sea Calcium is plant-sourced and derived from Lithothamnium, a hard, brittle red algae that grows off the southwestern coast of Ireland. The algae incorporates naturally-occurring calcium into its plant tissue in a loose structure so that it isn't dense like mined calcium. Lithothamnium provides a renewable source as the plant is left undisturbed.

RECOMMENDATION

Take one capsule with a meal three to four times daily.
