Digestive System Support

Lactase Plus provides the necessary enzymes to make milk and dairy products more digestible. This is an effective and convenient solution for people with a lactose intolerance. For many people it's not just the lactose (milk sugar) in dairy products that causes the bloating, gas, and other discomfort, but also the protein and fat. Lactase Plus combines lactase, lipase, and protease for maximum digestion to eliminate the discomfort.

Lactase Plus is protected with an exclusive herbal blend. The herbal blend serves three purposes:

1. Relaxes and soothes the stomach.
2. Activates the enzymes.
3. Buffers and stabilizes the enzymes.

RECOMMENDATION

Take 1 or 2 capsules up to three times daily before consuming foods and beverages containing lactose.
