Supports energy metabolism

- Transports fatty acids in the cell
- No yeast, wheat, gluten, milk or sugar

MENU

-Carnitine

500mg

A compound that is important in the process of energy metabolism.* Carnitine's main role is transporting fatty acids in the cell, which is an important step in energy production.* Most people receive sufficient amounts of carnitine to meet daily needs. If you think you may be at risk of low carnitine levels, talk to your doctor about taking a carnitine supplement. No yeast, wheat, gluten, milk or milk derivatives, lactose, sugar, soy or artificial flavor.
