Micellized D3 is a natural form of Vitamin D provided in a water-soluble micellized form. The micellization process produces tiny droplets (micelles) that are then formed into highly absorbable aggregate structures. Micellization greatly increases the solubility, absorption and bioavailability of our vitamin D3 over oil or emulsified forms.

Directions: Take two drops or more daily mixed in 1-2 oz. water or juice or as directed by your healthcare practitioner.

Caution: If you are pregnant or nursing consult your healthcare practitioner before use. Keep out of reach of children.

Storage: Store in a cool dry place.
