

NEW YOU™

BODY REVITALIZING FORMULA

Is there a certain age to start taking New You?

Because the body's production of human growth hormone begins to decline after the age of 30, most people will want to begin taking it at that age.

How often should I take New You and when?

New You is designed to be taken twice daily. Take one tablet in the morning and two tablets at night.

Can I give New You to my children?

New You is designed for adult use and is not recommended for children. Always consult your pediatrician before giving any supplements to children.

Can I take New You if I am pregnant or nursing?

We suggest that you consult your physician prior to using any of our products if you are pregnant or nursing.

US LABEL
