

Doctor's Best Pure Wild Alaskan Fish Oil with AlaskOmega® contains concentrated fish oil from sustainably sourced wild Alaskan Pollock. AlaskOmega® fish oil is produced within hours of being brought on board by at-sea catcher-processors, or by local shore processors. The oil is molecularly distilled, resulting in maximum purity, potency, and a very low TOTOX value. TOTOX is an indicator of marine oil freshness and the lower the value, the better the quality. The refining process ensures extremely low oil oxidation for optimal sensory characteristics and a clean taste.

This Alaskan fish oil provides 800mg EPA and 400mg DHA per serving. Total Omega-3 fatty acids support heart, joint, eye, and brain health.* This eco-friendly fish oil is certified by the Marine Stewardship Council (MSC), considered by many the gold standard for sustainability certification.

Helps support cardiovascular health*

Helps support eye and brain health*

Helps support joint health*

Sustainably sourced wild in Alaska and processed in the U.S.A.

MSC certified
