BioPure Protein® is a bioactive, pure whey protein concentrate with naturally occurring immunoglobulins, which may help support immune function. It provides nutritional support for individuals who wish to add a high quality protein to their diet to help promote health and well-being.*

BioPure Protein is prepared by utilizing a selective transfer membrane process at controlled temperatures and pH to capture active proteins and peptides while preventing the protein from denaturing (becoming inactive).

Directions: Mix about 2 scoops with a cold beverage or add to your favorite recipe once daily or as recommended by your healthcare practitioner. To prevent protein denaturation, do not mix in hot drinks or recipes that require baking or boiling. Also, do not mix with pineapples or papayas because their enzymes may denature the protein.

This product is non-GMO and gluten-free.

Storage: Keep tightly closed in a cool, dry place.

Contents sold by weight, not volume. Some settling may occur during shipping and handling. Serving size is measured by weight with a scoop included for your convenience. The amount of product contained in 2 scoops may be above or below 23 grams due to variations in handling and product density.
