Growth Hormone Research Chemical Facts
Research Serving: 1 Capsule
Research Servings Per Container: 60

Amount Per Serving	% Daily Value
Oral Human Growth Hormone	
MK677 Ibutamoren	10mg
(R)1'1'(2methylalanylobenzyl(Dseryl)1(methylsulfonyl)1 2dihydrospiro[indole3,4'piperidine])	
*Daily Value not established	

Other Ingredients: Cellulose, Magnesium Stearate, Silicon Dioxide
Growth Hormone in general is taken once or twice per day on an empty stomach. For example, first thing in the morning, and again before bed. Initial feedback is that this product is far stronger and more effective than prescription Growth Hormone. The effects are noticeable and first felt by an increase in body temperature, lowering of blood sugar, and light sweating. Hypoglycemia is a common side effect which is fixed by ingesting adequate carbohydrates after administration.

Warnings: This is a very potent Human Growth Hormone Secretagogue. This is not some GH booster you buy over the counter. With strength comes responsibility. **KEEP OUT OF REACH OF CHILDREN.** Use only under the supervision of a licensed physician after FDA approval as side effects may include heart attack, death, stroke, serious bodily injury, cancer, diabetes, diabetic coma, hypoglycemia, insanity, anxiety, insomnia, dehydration and more. Not for human consumption until prescribed by a doctor. Research Chemical.
