

FOLACIN IS A VERY IMPORTANT B VITAMIN. Research indicates it helps prevent birth defects when taken during the first 6 weeks of pregnancy. It may help protect against cervical cancer. Studies also indicate Folic Acid contributes to healthy arteries and prevention of heart disease, proving beneficial to those who have high homocysteine levels.†

¿Por que Néurobion® Fólico? Recientes estudios indican que el Acido Fólico ayuda a prevenir espina bífida en el embarazo cuando se suple en la dieta durante las primeras 6 semanas del embarazo. Investigadores sugieren que el Acido Fólico mas B6 y B12 podrían ofrecer protección significativa a las arterias antes de sufrir daños por la arteriosclerosis debido a la acumulación o altos niveles de la homocisteína.††
