

**SUGGESTED USAGE:** Take 1 capsule 2 times daily.

Arginine and citrulline are two amino acids that are integral to protein metabolism and utilization, as well as to the maintenance of muscle tissue.\* Both are key intermediates in the urea cycle, where they participate in the detoxification of ammonia via the production of urea.\* In addition, any arginine not converted to urea enters general circulation where it is distributed to various tissues and metabolized for other uses such as protein synthesis.\*
