

SUGGESTED USAGE: Mix 1 1/2 level teaspoons of AAKG Powder daily into water or your favorite juice. Take on an empty stomach. Not recommended for continuous, high-level use for more than 60 days.

AAKG (Arginine Alpha-Ketoglutarate) is a metabolic derivative of arginine, which is a conditionally essential amino acid that has a number of vital roles in the body.* Arginine plays a pivotal role in the urea cycle, helping to rid the body of excess ammonia.* This amino acid is also important in protein synthesis as well as for the support of healthy immune function.* As AAKG, this form of arginine is a key player in amino acid metabolism, as well as in energy production.*
