Natural Cracked Cell Wall
Time Released Delivery System

Introducing *Saccharomyces cerevisiae*,
"The Beneficial Yeast" - "Nature's Perfect Nutrient Carrier"

THE CHALLENGE

Nutrient survival throughout the harsh digestive process of the body has always been a major challenge for many supplements.

Oxygen, stomach acid and countless barriers pose great risk to the integrity of the valuable nutrients we consume.

THE BIO-STRATH[®] DIFFERENCE-
NATURAL MICROENCAPSULATION
DELIVERY SYSTEM

Bio-Strath Immune[™] starts by feeding powerful food substances loaded in nutrition to *Saccharomyces cerevisiae* "The Beneficial Yeast."

Being food itself, this ideal carrier readily absorbs the powerful nutrients fed to it and forms a natural protective barrier around them, helping to protect them throughout the digestive journey.

Its unique membrane phospholipids act as a liposomal structure encapsulating the different nutrients fed to it, both water and fat soluble alike providing a much needed physical barrier.

This external thick cell wall which composes of a beta glucan network and chitin associated with a mannoprotein layer make a natural sustained release delivery system as the cell wall cracks.
