

BLMD-590100

SIZE

DHEA 5 MG

100 TABLETS

Description

The body naturally produces ample amounts of DHEA before the age of 30, but those levels begin to decline soon after. Keeping healthy DHEA levels is crucial because they counterbalance the stress hormone, cortisol. Elevated cortisol levels cause stress, adrenal fatigue and interfere with mental functions. DHEA also acts as a foundation for hormones like estrogen and testosterone. Each tablet contains 5 mg of DHEA for easy incremental supplementation.

BENEFITS

- Improves Stress Resilience
- Balances Cortisol to DHEA Ratios
- Promotes Hormonal Balance
- Regulates Mood
