

L-Lysine is a necessary building block for all protein in the body.[†] This essential amino acid plays a major role in calcium absorption, building muscle protein, and the body's production of hormones and enzymes.[†] In addition, L-Lysine serves as a co-factor with vitamin C to support healthy cardiovascular function.[†]

L-Proline serves as a precursor to hydroxyproline, which is an essential component of collagen tissues that helps them maintain their structural characteristics.[†]

Warning: Not intended for children. Consult your physician prior to use if you are pregnant, nursing, have a medical condition or are taking medications.
