

Why EndoMune Chewable?

- Developed by gastroenterologist Dr. Lawrence Hoberman
- Recommended by healthcare professionals
- Specially formulated for ages 3-8
- Contains both prebiotics and probiotics

Suggested Use: For children 3-8 years of age. Chew one tablet daily, preferably with a meal. If children are taking an antibiotic, take EndoMune Jr. Chewable two hours before or two hours after antibiotic dosage.

Storage: Innovative packaging to protect against humidity. Refrigeration is recommended but not necessary.

Caution: Do not use if seal is broken. Please keep out of reach of children. Consult your physician before using if under medical care.
