

USAGE: Take 1 to 3 capsules with a meal containing fat or as directed by your qualified healthcare professional.

NOTE: If you have a medical condition, are pregnant, lactating, trying to conceive, under the age of 18, or taking medications, consult your healthcare professional before using this product.

Bile Acid Factors® consists of a mixture of highly-concentrated bile acids (also called bile salts), mostly in the conjugated form, from U.S. and/or New Zealand bovine bile.

- Bile acids are produced in the liver and then stored and concentrated in the gallbladder, from which they enter the small intestines via the bile duct.
- The major bile components in Bile Acid Factors® are glycocholate and taurocholate, which are crucial for fat absorption.*
- In the small intestine, bile acids are required to emulsify fats for absorption.* Inadequate bile acids can result in loose stools and reduced absorption of fat and fat-soluble nutrients.*
- Conjugated bile acids promote fat absorption and nutritional status.*

Keep out of the reach of children.
