

## IN A CLASS OF ITS OWN

*Created to maintain all original regenerative and immune enhancing native protein components naturally present in fresh raw milk.\**

The full range of nutritional native proteins in ImmunoPro® assist in the following: antioxidant production (Glutathione precursors), complete amino acid supplementation, healthy immune function, cellular repair and muscle growth.\* The whey is derived from disease-free cows that graze year-round on pesticide-free, chemical-free, natural grass pastures. It is hormone-treatment-free, GMO-free, and uniquely processed to ensure the full range of bioactivity.

**DIRECTIONS:** Shake, stir or lightly blend one or more scoops into water, milk or dairy substitute. Consume 1 or more times daily, preferably on an empty stomach. Wait 15 minutes before eating. Drinking slowly is recommended. The initial uptake of the native protein peptides is in the mouth. You may also place 1/2 tsp. or more of powder in mouth and chew anytime.

**NOTE:** To prevent protein denaturation, do not mix with acidic fruit juices or liquids above room temperature. A sweetener may be added for flavor. Keep container closed. Store in a cool, dry place. Serving scoop enclosed in jar. Suitable for pets.
