

Oxydrene®

Deep Tissue Oxygenator* [Crenulin-RCC®]

The Clinically Proven Deep Tissue Oxygenator**

Since its introduction into the U.S. market, Oxydrene is fast becoming the most sought-after compound among body builders who want to maximize muscle growth, baby boomers who fear slowing down, dieters who want to speed up fat loss, skiers who need oxygen at high altitude, as well as Viagra®** users and their partners who have discovered that stamina and endurance are the key to total fulfillment. How can all these diverse groups find satisfaction in the same Oxydrene formula? The answer lies within Oxydrene's clinically proven ability to increase oxygen saturation of blood and tissue. Oxydrene helps provide the cellular oxygen required to increase time to exhaustion, decrease recovery time, and delay muscle fatigue associated with oxygen depletion. In other words, Oxydrene provides you with the power to keep going.

Cautions: If you are currently taking a prescription medication, consult with your physician before taking this product. Not for use by pregnant or nursing women. Not for use by individuals under the age of 18 unless directed by a doctor. If you or your health-care provider have any questions, call 1-800-898-5153.

Keep out of reach of children.
Do not purchase if seal is broken.
Individual results may vary.

Note: If you are an athlete competing under International Olympic Committee (IOC) or World Anti-Doping Agency (WADA) rules, it should be noted that the IOC and WADA have banned any substance capable of increasing blood oxygen levels. Because this ban might include Oxydrene (due to its ability to optimize blood and tissue oxygen levels), competitive athletes should check with their trainers and governing bodies before using Oxydrene in organized athletic competition.

Protect from heat, light, and moisture. Store at controlled room temperature 15°-30°C/59°-86°F

Tested under verified hypoxic conditions.
