Eco-Friendly. Krill is one of earth's most abundant and sustainable organisms. The harvest of krill is well below conservative international catch guidelines. MegaRed® goes a step further by only sourcing krill from the Antarctic where krill is most abundant. This helps the ecosystem maintain a healthy, sustainable krill population.

This product comes from a fishery that has been independently certified to the MSC's standard for a well-managed and sustainable fishery. www.msc.org

What are Omega-3 fatty acids, EPA and DHA?

Omega-3s are critical to human health and provide the building blocks for all your cells.

EPA and DHA are two different types of Omega-3s. Studies have shown that higher intakes of EPA and DHA help support some of the most relevant areas of heart health.★

What is Krill?

Krill are tiny crustaceans that thrive in the frigid waters of the Antarctic. Differently from fish oil, oil from krill carries its Omega-3 in a phospholipid form which helps absorption in the human body. The krill used in this product is 100% pure and harvested below conservative international catch guidelines.
