

Multi-Step Delivery System

PHASE 1 – PREBIOTIC RELEASE

A liquid prebiotic is released, providing nourishment for the probiotic bacteria to flourish and grow once it enters the intestine. It also supports a healthy gut pH and discourages further growth of unfriendly bacteria.

PHASE 2 – GASTROINTESTINAL PROTECTION

FIRSTBIOTIC's inner capsule is protected from degradation, allowing it to travel past the stomach into the intestine.

PHASE 3 – PROBIOTIC MULTIPLICATION

The FIRSTBIOTIC probiotic blend is released into the intestine.. The environment created by the prebiotic allows the probiotic bacteria to multiply and grow, maintaining a healthy environment in the gut.

Supplement Facts

Serving Size: 1 Vegetarian Capsule
Servings Per Container: 30

Prebiotic	Amount per serving

WHY PREBIOTICS?

Poor diet, pollutants and antibiotics can wreak havoc in your gut and lead to overall health concerns.

Prebiotics provide nourishment for probiotic bacteria to counteract these negative effects.†

WHY PROBIOTICS?

Probiotic provide "friendly" bacteria that regulate your inner ecosystem, allowing you to perform and feel your very best!†
