DIETARY SUPPLEMENT

ATHLETIC SERIES

DIBENCOZIDE

COENZYMATED™ B-12

30 LOZENGES

Supplement Facts

Serving Size 1 Lozenge

	Amount Per Serving	%DV
Vitamin B-12 (from 10 mg dibenzozide [Coenzymated™])	8.6 mg	143,333%

Other ingredients: sorbitol, mannitol, natural raspberry flavor, modified cellulose gum, natural peach flavor, and magnesium stearate.

THE BENEFITS OF COENZYMATED™ VITAMINS

In order for vitamins to be utilized by the body, they must first be converted into their active coenzyme forms. Coenzymated™ B-12 is ready to go to work immediately. Dibenzozide is another name for adenosylcobalamin, a primary coenzyme form of vitamin B-12 essential for processing branched chain amino acids for energy production in the mitochondria. Vitamin B-12 is also necessary for the production of red blood cells that deliver oxygen to tissues for energy production. Supplementation with vitamin B-12 can help ensure optimal energy production during prolonged exertion. Coenzyme supplementation reduces the body's need to synthesize the active forms of vitamin B-12, unlike the commonly used cyanocobalamin, which the body must convert to the coenzyme forms.*

Suggested Use: 1 lozenge daily between meals or 30 minutes before workouts. For best results, allow to dissolve in the mouth before swallowing.

NOTE: If you are pregnant, may become pregnant, or breastfeeding, consult your health care professional before using this product.

Do not use if either tamper-evident seal is broken or missing. Keep out of the reach of children.
