The circulatory system, or cardiovascular system, provides cells with food and oxygen, and at the same time rids the body of carbon dioxide and other waste materials. The three primary components of this system are the heart, the blood and the blood vessels. The ingredients in this 30 day **Circulatory System** program are formulated to maintain the healthy functions of the circulatory and cardiovascular systems.*

Circulatory System

Supports the Body's Cardiovascular Function*

DIETARY SUPPLEMENT - 30 DAY PROGRAM
60 PACKETS - (90 Capsules, 90 Softgel Capsules)

Ginkgo & Hawthorn Combination: Ginkgo is traditionally known to support healthy circulation, and has antioxidant properties that support cardiovascular health. Hawthorn berries contain flavonoids and other compounds that may help maintain a healthy cardiovascular system.*

Co Q10-100 mg: Helps produce energy at a cellular level and acts as an antioxidant. This ingredient is shown to protect cardiac cells and to promote the regeneration of vitamin E, another heart-healthy antioxidant. Co Q10 can also help maintain blood pressure levels already in the normal range.*

Super Omega 3-EPA: Provides essential fatty acids that are good for the heart. Among a host of other benefits, supportive but not conclusive research shows that the consumption of EPA and DHA fatty acids may reduce the risk of coronary heart disease.*
