Recent research has demonstrated that *gamma*-tocopherol, the main dietary source of vitamin E, has a very important role in supporting health. *gamma*-Tocopherol is a more effective antioxidant than *alpha*-tocopherol and may be an important factor for a healthy cardiovascular system. It also inhibits the COX-2 enzyme, according to *in vitro* tests. Research indicates that a ratio of *gamma*- to *alpha*-tocopherol greater than 1:1 increases levels of both tocopherols in the body and that *alpha*-tocopherol alone may not be adequate to combat oxidative stress. Source Naturals **GAMMA E 400** offers a 3:1 *gamma*- to *alpha*-tocopherol ratio (190 IU equals 126 mg) and also contains tocotrienols from palm fruit which provides high concentrations of all four tocotrienols: *alpha*, *beta*, *gamma*, and *delta*. Sesame seed oil, rich in *gamma*-tocopherol, is used as the base.*
