Nitric Oxide production is critical for blood flow and nutrient delivery to active cells during intense workouts.* NOS Blast Factor can be beneficial during exercise when blood flow dramatically increases, and with a post-workout shake when your body demands a rapid supply of amino acids and carbohydrates for recovery.* Try stacking NOS Blast Factor with Whey Protein immediately after your workout to support amino delivery.* NOS Blast Factor contains unique ingredients such as Korean Ginseng and Niacin. Ginkgo Extract is also included for blood flow support.*
