Discussion: Hydroxocobalamin is a unique form of vitamin B12, which is more readily converted into the coenzyme forms than conventional cyanocobalamin. This allows hydroxocobalamin to serve as an effective broad-spectrum form of vitamin B12.*

Directions: Take 1 lozenge under the tongue daily with or without food, or as directed by a qualified health care practitioner.

Caution: Consult your physician before use if you are pregnant, lactating, have a medical condition, or are taking any medication. Keep out of reach of children.
