

Muscle Feast L-Leucine is designed to stimulate muscle protein synthesis and decrease muscle soreness. It can also decrease recovery time between workouts and increase lean muscle mass. By itself L-Leucine can stimulate muscle protein synthesis; the process responsible for muscle growth and recovery. This is why it is often referred to as the "main" amino acid.

SUGGESTED USE:

As an adult dietary supplement, take one serving (2.5g) in 6-8 ounces of a flavored beverage, 2-3 times per day or as directed by your doctor.
