

GOLIATH LABS

ISOLATE[®]

PERFORMANCE SERIES

PROTEIN

++ ISOLATE PERFORMANCE SERIES PROTEIN is 99% Bio-Available which means your body will absorb and benefit from virtually every gram. Other whey proteins on the market contain inferior low protein concentrates which can inhibit digestion and utilization.

ISOLATE PERFORMANCE SERIES PROTEIN contains only protein isolates, pure flavoring.

CHOOSE ISOLATES OVER CONCENTRATES - In creating this unique product, larger protein molecules found in concentrates called oligopeptides and polypeptides are broken down into the smallest protein parts possible called dipeptides and Tripeptides. This form of protein is the most Bio-Available form of protein and moves very easily across the intestinal walls during digestion. These smaller protein chains, along with free amino acids called Isolates, allow the body to absorb more protein unlike other products on the market.

BENEFITS OF ISOLATE PERFORMANCE SERIES PROTEIN - the amino acids found in protein contribute to tissue repair, hormone regulation and are essential for intercellular communications throughout the whole body. As more protein is absorbed into the body, the benefits increase proportionately. Since ISOLATE PERFORMANCE SERIES PROTEIN is an isolate, nearly every gram of protein you intake is used, digested and absorbed in the body.

WHO SHOULD USE ISOLATE PERFORMANCE SERIES PROTEIN - Because of its purity, males and females both young and old alike can enjoy the benefits. Specifically, it helps in areas including sports nutrition, weight management, immune support, bone health and general wellness.
