

Directions: Take two (2) capsules at night. For best results, use for 4 to 8 weeks. Do not exceed 8 weeks of continuous use. Always check with a knowledgeable physician or health care practitioner before using any dietary supplement.

Warnings: Consult with a licensed physician before using this product. Do not take this product if you have prostate hypertrophy, liver disease, kidney or heart disease.

Natural PCT: When your body has an outside source of hormones (such as testosterone and substances that convert to it), your body decreases its natural output of those hormones. When natural production of testosterone is low, estrogen levels are typically elevated wreaking havoc on your hard-earned muscle.*

Post Cycle Therapy (PCT) works in three 'ways. (1) it stops the body from forming the aromatase enzyme which the body uses to convert androgens to estrogen (2) it restarts the body's natural production of testosterone (3) it contains powerful antioxidants that enhance liver health.*
