

A water-soluble vitamin, **B-12** is essential for proper energy metabolism, nerve and mental function, red blood cell formation, and cardiovascular health. It is important for everyone, but especially for vegetarians and seniors who tend to be lacking in B-12.[†]

Offering twice as much absorption as other forms, our unique ion-exchange resin protects vitamin B-12 from gastric acid of the stomach, delivering the nutrient to the small intestine where absorption takes place.
