

Zinc is an important mineral found in every cell in the body. It is required for the proper functioning of the body's natural defenses and is required for protein synthesis, wound healing and growth hormones. Zinc also helps maintain normal taste and smell acuity, and promotes healthy skin. Adequate intake of zinc is essential for good health.[†]

By creating this supplement as a chelated mineral, our amino acid Chelated Zinc 30 mg is a more efficient form for the body to use than some other forms.[†]
