

Mushroom Immune Max combines the mycelium of six potent medicinal mushrooms grown on a bed of immune-enhancing botanicals in the US. Research shows that these mushrooms can modulate immune cell responses such as NK cell activity and cytokine production, which promotes optimal immune system activity and maintains healthy cellular function.*

Mushroom Immune Max is uniquely formulated and cultivated to provide effective immune support, and the formula has been investigated to reveal positive support for breast cells.*

- Promotes Healthy Immune Function*
- Active Cellular Health Support*

Mushroom Immune Max is Vegan/Vegetarian Safe, Gluten-free and Non-GMO
