

PATENTED WEIGHT-LOSS POTENCY!

Do you want a lean and toned body?
This new breakthrough can be the key to both!

Coleus forskohlii is an herb originating from India. Yet not all *Coleus forskohlii* are the same. Recent breakthroughs credit a special extract as the key to looking leaner. Here's the skinny on how it works and why this patented extract may help you sculpt a leaner, sleeker body.¹

ForsLean® is the proprietary extract of *Coleus forskohlii*'s active ingredient, Forskolin. It increases cAMP (Cyclic Adenosine Monophosphate) to help increase lean body tissue and break down fat tissue.^{2,3}

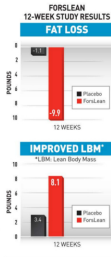

ForsLean has been extensively tested for purity and potency. **FORSKOLIN LEAN & TONE** with ForsLean extract offers the only patented 10 and 20% extract with published studies showing a decrease in body fat and body weight and an increase in lean tissue.^{4,5}

In one study, ForsLean subjects lost 4.02% of their total body weight while the placebo group actually gained weight (0.29%). In a subsequent 12-week, randomized, double-blind, placebo controlled study, ForsLean subjects lost 9.9 lbs of fat mass and gained 8.1 lbs of lean body mass vs. fat loss of 1.1 lbs and gain of 3.45 lbs lean body mass for the placebo group!^{6,7}

The conclusion?

ForsLean has been shown to increase important metabolism-boosting lean tissue as it reduces body fat, helping our bodies become more efficient fat-fighting machines. If your goal is to look leaner and more toned, Forskolin Lean & Tone with patented ForsLean may help you tip the scales in your favor so you can reach your goals faster.⁸

QUALITY AND RESULTS!

ForsLean®
INCLUDING 20% FORSKOLIN

"ForsLean® shifts the proportion between lean body mass and adipose, or fatty, tissue in favor of lean body mass, which improves overall health," explains N. Kalyanram, Ph.D., Sabinsa Corporation's President of Research and Development.

"The effect can be measured by decreases in the waist/hip ratio and the body mass index."

ForsLean® is a proprietary ingredient, patented for use and composition in promoting lean body mass, reduction of adipose tissue (fat) and weight loss [US Patent # 5,804,594]. Look for real ForsLean, listed by name, rather than a generic form of forskohlii to ensure quality and results.
