

As a naturally-occurring hormone, Melatonin is involved in setting our body's natural physiologic cycles. It assists the body to normalize sleep disruption, thereby helping alleviate the fatigue that often accompanies chronic lack of sleep. Our high quality source in a 1 mg dose offers flexibility in dosing. This natural peppermint-flavored lozenge uses xylitol (from birch tree) and sorbitol, two low calorie and natural sweeteners.†

Caution: Do not exceed recommended dosage. Use only at bedtime. Do not use if pregnant or nursing. Regular dosage for individuals of any age should be limited to two weeks; do not exceed 3 mg in any 24 hour period. If less than 40 years old, do not use regularly for any purpose except on advice of a health care practitioner. If you have diabetes, an autoimmune, endocrine, depressive, or seizure disorder, consult your health care practitioner before use. Do not drive or operate machinery while taking this product. Not intended for use by children under age 18.
