

Vitamin C (Ascorbic Acid)

Ascorbic Acid is an essential vitamin, meaning humans do not produce this vitamin so sufficient amounts must be consumed through diet. Ascorbic Acid is a powerful scavenger of free radicals, possessing strong anti-oxidant properties. In addition to this protective property, ascorbic acid is used directly by the immune system to attack viruses. Excess Cortisol has been shown to cause a number of health problems and Ascorbic Acid helps the body to maintain Cortisol within a healthy range. Enhance your immune system and reduce Cortisol with this important nutrient.**
