

i-Sabi™ Wasabi: A Super Antioxidant*

Wasabi is widely known for being a condiment to sushi and for its sharp distinctive flavor. What most sushi lovers may not know are the many health benefits that authentic wasabi possesses. Unfortunately, due to the expensive nature of harvesting authentic wasabi (botanical name *Wasabia japonica*), most commercially available products sold as "wasabi" are imitation and made from western horseradish with added food coloring.

i-Sabi™ is made from pure rhizomes of pure *wasabia japonica*, a source of potent antioxidant phytochemicals called isothiocyanates (ITCs). i-Sabi is trademarked "The Master Switch to Wellness™" given its ability to work via the NRF-2 protein pathway, a genetic master switch that triggers a set of genes involved in the protection of cells against various oxidative stresses.*
