

iSabi™ Superfood Formula

i-Sabi™ wasabi is a source of potent antioxidant phytochemicals called isothiocyanates (ITCs). i-Sabi™ is trademarked "The Master Switch to Wellness™" given its ability to work via the NRF-2 protein pathway, a genetic master switch that triggers a set of genes involved in the protection of cells against various oxidative stresses.*

To improve taste and palatability, we blended iSabi with the finest fresh cut wheatgrass powder to create a refreshing drink mix. Rich in phytonutrients, vitamins, minerals and plant proteins, wheatgrass provides a revitalizing spectrum of nutrients to supercharge your immune system. Health Logics iSabi Wasabi Superfood Powder makes an excellent fresh tasting beverage when mixed with water, your favorite juice or smoothie.
