

The Perfect Ratio of Soluble & Insoluble Fibers

In nature, most plants contain both soluble and insoluble fibers which are essential for your body to maintain regularity and digestive health. However, most fiber supplements on the market only provide soluble fiber. Just like in nature, Fiber Trifecta™ delivers the perfect balance of soluble to insoluble fiber in a 3:1 ratio, to help you achieve proper balance. Fiber Trifecta has been formulated to meet your daily fiber needs. This product is free of sugars and additives. You can adjust your daily intake depending on your fiber needs.
