

L-Carnitine is synthesized in the body from the essential amino acids L-Methionine and L-Lysine in a multi-step process. Most of the body's Carnitine is located in skeletal and cardiac muscle and can also be found in the liver and kidneys. This formulation provides L-Carnitine along with other unique, researched and patented forms of Carnitine to foster synergy and to promote optimal absorption and assimilation.*

Carefully Manufactured by:
Solgar, Inc.
