John-316.net

Western science has identified less than 3% of the medicinal plants that grow in the Amazon Rainforest. Yet drugs derived from just these plants account for 25% of the Western medicine's pharmacopoeia, including some of the most potent medications known. Imagine what health miracles await us in the remaining 97%!

Acerola cherry also known as Barbados cherry or wild crapemyrtle, is a tropical fruit-bearing shrub or small tree in the family Malpighiaceae. It is juicy, often as much sour as sweet in flavor, and contains 30x more vitamin C than found in oranges! Acerola is also packed full of Vitamin A, Folate & Potassium and is an excellent antioxidant. Because of the high natural vitamin C found in Acerola it helps other antioxidants become fully absorbed.

Our Acerola Cherry capsules are made with organic freeze dried Acerola powder that is fair trade compliant, kosher certified and sustainably harvested. Visit us on the web at www.amazonthunder.com for more information and to see all of our Organic Amazon Rain Forest Supplements.
