

Why JayLab Pro Protein?

Because it is derived from a Whey Protein Isolate that is one of the most pure and cold processed whey proteins available.

Because it is engineered via a novel, ultra-low temperature microfiltration process to contain a full spectrum of bioactive whey proteins.

Because it contains lactase and Aminogen® (maltodextrin and protease enzymes derived from *Aspergillus niger* and *Aspergillus oryzae*) digestive enzymes to further enhance absorption and digestion.

Because it easily and completely mixes with water, nonfat milk or your favorite beverage.

The Jaylab Pro Protein proprietary blend consists of:

- Microfiltered Whey Protein Isolates
- Ion-Exchange Whey Protein Isolates
- Ultrafiltered Whey Protein Concentrat
