

#CleanSeas

XYMOGEN is committed to reducing the amount of plastics used throughout our business, particularly in the packaging of our products. With our participation in the United Nations Environment Programme Clean Seas initiative, we strive to positively decrease our environmental footprint, providing results that can ultimately:

- » Help free the ocean of litter, making it safer for millions of marine animals.
- » Reduce the use of non-renewable resources.
- » Keep wild-caught seafood healthy and safe to eat.
- » Protect maritime economies such as organic fishing, tourism, and recreation.

BrainSustain™ represents more than 30 years of neuroscience research. Designed to address brain health, structure, and function, BrainSustain contains a variety of nutrients and cofactors that support mitochondrial energy production, antioxidant systems, neurotransmitter production, and cell membrane integrity.†

BrainSustain features 50 mg of EVNol™ in every serving. EVNol is a patented full-spectrum, pure d-mixed-tocotrienols complex derived from red palm oil—a scientifically validated source. It provides all four tocotrienol isomers (alpha, beta, gamma, and delta) in natural ratios. Tocotrienols offer extraordinary protective benefits to brain cells (e.g., white matter) and neurons, and higher serum levels of tocotrienols are associated with cognitive health. This brain health formula also features VegaPro®, XYMOGEN's proprietary pea/rice protein blend; Aminogen®, to facilitate protein absorption; and activated B vitamins, including Quatrefolic® (5-methyltetrahydrofolate or 5-MTHF).†

One serving of BrainSustain powder provides the same amount of N-acetyl-L-cysteine phosphatidylserine, acetyl-L-carnitine, alpha-lipoic acid, coenzyme Q10, and glucoraphanin (trubroc®) as eight capsules of XYMOGEN's NeuroActives™ BrainSustain™.
