TURMERIC 400TM
CURCUMIN

Optimized Turmeric Extract
Activated Phospholipid Complex

Dietary Supplement | **360** Easy-to-Swallow Capsules

Andrew Lessman's TURMERIC 400 delivers Turmeric Root extract standardized for the highest levels of **curcuminoids** that we then activate with phospholipids to naturally overcome Turmeric's absorptive challenges. Turmeric is the quintessential Asian spice, most prevalent in Indian cuisine. The last decade has seen Turmeric receive more credible scientific attention than any other plant-based compound. This clinical research has only continued to validate Turmeric's extensive and wide-ranging potential health benefits. Initially, the focus was on Turmeric's soothing role in joint health, as well as its supportive role in liver health and detoxification. More recently, Turmeric has been acknowledged for the protection it offers to delicate brain structures, along with other organs and body tissues. Remarkably, Turmeric's impressive volume of supportive research has only continued to expand; however, creating an effective Turmeric supplement is difficult and is more than placing some Turmeric in a pill, since unfortunately, its benefits cannot be ensured without facilitating the absorption of its curcuminoids. We accomplish this by complexing its curcuminoids with Phosphatidylcholine (PC) – the predominant phospholipid found in the brain, liver and throughout the body. This unique phospholipid complex protects curcuminoids from digestive damage while dramatically increasing their absorption. This natural combination ensures the greatest benefits from the powerful protective compounds found in this remarkable traditional spice.
