BCAA to Support:

- Antioxidant Activity*
- Lean Muscle Growth*
- Increased Endurance*
- Stronger Recovery*
- Enhanced Performance*

LEAN MUSCLE DEFINITION*

For an extreme body cutting and lean muscle defining solution, nothing comes close to Omega Cuts® ELITE. Omega Cuts® ELITE's MCT-based Muscle Sparing Blend works in conjunction with its CLA-based Muscle Toning Blend to more readily target fat for greater muscle definition. Omega Cuts® ELITE is an anti-catabolic formulation designed to support energy and fat loss without sacrificing your hard-earned muscle in the process. These blends work in complementary union to specifically target and shred the fat between the muscle, to help bring out your show muscles!

MUSCLE SPARING BLEND.

MCTs (Medium-Chain Triglycerides) enter the bloodstream quickly, immediately acting as an available source of energy, with only a small percent being converted into body fat. They help stimulate thermogenesis, a process where the body generates energy, or heat, by increasing its normal metabolic, fat-burning rate.* Omega Cuts® ELITE's MCTs ultimately help to provide that desirable ripped and lean muscular appearance.*

MUSCLE TONING BLEND.

Omega Cuts® ELITE also features a Muscle Toning Blend with CLA 95%, the purest, most concentrated form of CLA.* CLA is a fatty acid with a strong and supported reputation for aiding fat loss, and helps to shrink stubborn fat areas, commonly located around the stomach, hips, waist, butt and thighs. This unique blend combines CLA with EFAs (essential fatty acids), and together they help reduce the amount of fat that is broken down, deposited and stored in the body.* This blend is what helps support a defined, ripped six pack.*

VERSATILE FORMULA*

Omega Cuts® ELITE is an extremely versatile sports nutrition product that can be implemented into any supplementation program.* This non-stimulant formula can be used by anyone to support the achievement of training goals. Omega Cuts® ELITE can also be used long-term once goals have been met as part of a training maintenance regimen.*
