

KetoBlitz is a formulation containing the patent pending ingredient, **BalanceBHB**, a pH-optimized blend of BHB acid and BHB salts. As such, KetoBlitz provides the active Beta-Hydroxybutyrate (BHB) at unprecedented levels, while reducing mineral salts content.

Ketoblitz elevates blood ketone levels, provides a quality source of energy for the body and brain, and suppresses appetite. KetoBlitz may be used by ketogenic dieters as a non carbohydrate-based energy source. It may also be consumed with carbohydrates for additional energy needs while sparing glycogen stores. KetoBlitz is pH balanced, naturally flavored, and sweetened with stevia.

CAUTION!: Before using this product consult with your physician if you are using any prescription or over the counter medicine; if you are unaware of your current medical condition or if you have any pre-existing medical condition.
