**PRODUCT NO. 81008**

IFC. 1137865

Mitochondrial dysfunction is directly linked to age-related issues. PQQ is shown to nutritionally support mitochondrial biogenesis (growth of new mitochondria in aging cells), essential to sharp thinking, accurate memory and clarity of thought.

**BrainCeutix PQQ** helps activate the genes that govern mitochondrial repair, production, and protection. Add 20 mg PQQ daily to promote optimal defense against neuronal degeneration.\*

**PQQ** helps the brain in 3 important ways:

- **Stimulate:** Promotes stimulation of mitochondria, resulting in more energy and stronger brain signals\*
- **Protect:** Supports protection of brain cells from metabolic toxins and helps clear cellular debris for improved healthy brain function\*
- **Regenerate:** Supports regeneration of new brain cells and growth of new mitochondria in aging cells for more brain power\*

**BrainCeutix PQQ 20 mg:**  
**the smart thing to do on a daily basis!**  
Stimulate • Protect • Regenerate
