

## Omega-3 Nutrition as Nature Intended

Pure Alaska Omega Salmon Oil is an all-natural fish oil made with free swimming salmon from the clean, cold, & pristine waters of Alaska. Wild-caught Alaskan salmon are exceptional because they:

- \* Are certified sustainable
- \* Contain Astaxanthin and vitamins A, D, & E
- \* Are low in contaminants like mercury
- \* Are high in Omega-3 fatty acids.

## How It's Made

Our unique Cold Press oil extraction method is a gentle low temperature process designed to protect all omega fatty acids in their natural triglyceride (nTG) form, as well as vitamins A, D & E and Astaxanthin – the same balance of natural compounds found in fresh salmon. We believe Pure Alaska Omega Salmon Oil is the next best thing to eating salmon!

USP has tested and verified ingredients, potency, and manufacturing process. USP sets official standards for dietary supplements. See [www.uspverified.org](http://www.uspverified.org)

† Supportive but not conclusive research shows that consumption of EPA and DHA omega-3 fatty acids may reduce the risk of coronary heart disease. [See supplement facts for total fat, saturated fat, and cholesterol content.]
